

Multilingual WiseImage 25

WiseImage 25 is now multilingual! Experience the new localization updates and performance *enhancements* firsthand with a released version

The CSOFT team announces the release of the multilingual version of WiseImage 25. This update opens a new chapter in the software's usability, bringing it closer to more languages and cultures. The latest version is a testament to CSOFT's commitment to making advanced design tools accessible to users worldwide.

Now, WiseImage is available in 9 languages:

- English
- Chinese (Traditional)
- Suomi
- Français
- Japanese
- Nederlands
- Portuguese
- Svenska
- Chinese (Simplified)

Updated prerequisite

WiseImage 25 now supports **Microsoft Visual C++ Redistributable 2022 Version**. It does not require any lower version of **Microsoft Visual C++ Redistributable** as a prerequisite

Updated License server:

WiseImage License Server has been updated. Currently WiseImage 25 is using FlexLM version 11.19.5

Moreover, various Bugs have been fixed and with some new features WiseImage 25 is ready to use.
